Day 1 topics – Exploring Small Ruminant Grazing

Sheep, Goats, Swine, & Poultry on Pasture: What's right for you?

Tools to help you plan your farm

Forage choices and Grazing Management for Small Ruminants

Pastures & Parasites

Fence & Water infrastructure for small ruminants

Day 2 topics – Getting Started; What You Need to Know

What is MiG & what can it do for you

Grazing management based on ecosystem processes

Solar energy flow, water cycle, mineral cycles, biodiversity

Creating excellent pasture from the soil up

Grazing management for targeted animal performance

Day 3 – Have you ever thought about it this way?

Seven things I have learned over the past 40 years.

Managing cow costs means more than just using generic ivermectin

Year around grazing should be the norm not the exception

Why developing grazing infrastructure pays

Day 4 – Planning a Grazing System for Tough Times

What really determines profitability in ranching

Integrating livestock and crops for soil health

Managing cover crops and legumes for grazing and forage quality

Grazing for biodiversity,

Grazing effects on the soil & plant community

Workshop sponsored by Kansas Grazing Lands Coalition,
NRCS, KS SARE, KCSAAC
Kansas Farmers Union
